

Advantages

Our lithium-ion battery delivers best-in-class energy density (> 620 Wh/kg) among chemical batteries. It has an open-circuit voltage ≥ 3.65 V, with an operating voltage range of 3.3–3.6 V. Its wide operating temperature range (-55 °C – +85 °C) ensures it will deliver consistent, long-term (10+ years at room temperature) performance in a variety of usage scenarios, including IoT, sensors, R&D instruments, automotive telematics, military equipment, utility meters, alarms, and security systems, and storage and tracking devices.

Electrical Specifications

At 23 ± 2 °C, the battery begins to discharge with a $10 \mu\text{A}$ base current. The battery releases one pulse (70 mA/0.1 s) every 2 minutes during discharge. The battery voltage should not be less than 2.7 V. The voltage value depends on the pulse characteristics, temperature, and usage of the battery.

Available terminations
